

Problem Solving A3 Report

Topic: Watch Videos With Others	Date: January 20 2021	Owner: Victor M Baez Morales
------------------------------------	--------------------------	---------------------------------

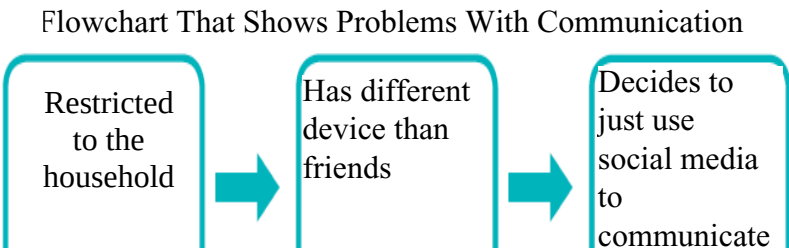

1.Identify The Problem

Due to the ongoing pandemic, people are restricted to their homes which severely hinders their ability to interact with others. This in turn results in a decrease on the amount of social interactions that they are subject to. This type of environment has a negative impact on relations regarding friends and family members. Social media is somewhat of a solution to this but it does not provide a person with enough resources so that an interaction is comparable to one that is had in the outside. If no change is made there will a massive impact in the way people socialize and interact with one another.

2.Set a Target

To provide a platform that will allow people to watch videos and chat with others without the need to download software.

3.Analyze Causes

4.Propose Countermeasures

Cause	Countermeasure	When
Person does not meet hardware requirements to download a modern app	Create a website that allows its users to chat and watch videos that are synced with one another	One Semester

5.Check/Evaluate

- Is the website functional?
- Can the website run correctly while on constant use?
- Is the platform easy to use?
- Is it accessible to most people?
- Does website cause freezes on a mobile device or any type of software issue?
- Can the website work with more than 2 people?

6.Act/Standardize

- Are the users satisfied with the performance of the website?
- Is there an aspect of this website that needs polishing?
- Is the website able to give a proper channel for sharing opinions with others?
- Does the website accomplish its goal of allowing its users to watch videos together and interact?
